PROFESSIONAL SUMMARY

Computer Science undergraduate with expertise in Java, JavaScript, React.js, Node.js, Express.js, MongoDB, and RESTful API development. Built full-stack web applications featuring JWT authentication, AI-powered functionality, and real-time communication. Solved 200+ LeetCode problems demonstrating strong problem-solving and software engineering skills.

EDUCATION

Amity University Lucknow Campus

2023 – 2027

Bachelor of Technology in Computer Science and Engineering

CGPA: 8.26

Focused on Software Development, Artificial Intelligence, Web Technologies, and Data Structures & Algorithms.

Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Software Engineering.

Languages: Java, JavaScript, C++

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, REST APIs

Databases: MongoDB, MySQL

Authentication: JWT, RBAC

Tools: Git, GitHub, Postman, VS Code, IntelliJ IDEA

Deployment: Vercel, Render, Netlify

CS Fundamentals: DSA, OOP, DBMS, OS, CN

PROJECTS

NextGen AI-Powered E-Learning Platform

GitHub

React.js / Node.js / Express.js / MongoDB / Tailwind CSS / JWT

- Designed and developed a full-stack Learning Management System using the MERN stack.
- Implemented JWT-based authentication and Role-Based Access Control (RBAC) for secure user access.
- Developed RESTful APIs for course management, student enrollment, and learning progress tracking.
- Built instructor dashboards for course creation, lecture management, and curriculum organization.
- Integrated AI-powered recommendation features to enhance personalized learning experiences.
- Designed responsive user interfaces using React.js and Tailwind CSS for seamless cross-device compatibility.

SyncMeet – Real-Time Video Meeting Application

GitHub

Tech Stack: WebRTC / Socket.io / Node.js / Express.js / React.js

- Developed a real-time video conferencing application using WebRTC and Socket.io.
- Built a signaling server with Node.js and Express.js to establish peer-to-peer communication.
- Implemented room creation, participant management, and live messaging functionality.
- Designed responsive interfaces to provide a consistent meeting experience across different devices.
- Integrated real-time communication features to support collaborative online meetings.

NovaUI – React Component Library

GitHub

Tech Stack: React.js / Tailwind CSS / Redux Toolkit / Framer Motion

- Developed reusable React components following a modular and scalable architecture.
- Designed responsive layouts using Tailwind CSS to ensure compatibility across screen sizes.
- Integrated Redux Toolkit for efficient global state management.
- Implemented interactive animations using Framer Motion to improve user experience.
- Structured reusable UI components to simplify frontend development workflows.

ACHIEVEMENTS

- Solved 200+ LeetCode problems, demonstrating strong problem-solving and algorithmic thinking.
- Built multiple MERN applications featuring authentication, REST APIs, and real-time communication.
- Strong foundation in software engineering, problem solving, and full-stack development.
